Spare parts, Service & Modifications

Spare parts

Good technical service is essential. That is why Universal Corrugated is keeping a broad range of spare parts on stock, both for stackers as well as for all other Universal Corrugated machine types. The genuine, top quality spare parts are exclusively available through our spare parts department only. We provide reliable and fast delivery.

Our spare parts department can be contacted for questions or support at any time. Please don't hesitate to contact us in order to be at your service.

Service

Your Universal Corrugated machines can receive a survey of the wear-and-tear parts, which are recommended by our experienced service department, to be replaced. This will lead to an improvement of the production quality, reduction of production expenses as well as security of the machine.

After the service visit you will receive a detailed report with the technical evaluation of your specific machine. Based on that, advised adjustments can be discussed and scheduled. It is also possible to arrange a service contract for a certain timeframe. This will provide you with a regular check-up and fine adjustment of your machine. Also 24 hour support can be provided within this service contract.

The decision about the replacement of the wear- and tear parts and the eventual support by Universal Corrugated is up to the customer. Please contact our service department in order to discuss all possible solutions for your specific situation.

Modifications

All existing machines, whether Universal Corrugated brand or not, might require a modification in order to meet the micro-flute requirements, raise the capacity, reduce production losses and stand-still times. Based on typical customer requirements, all possible modifications are described in our specific modification brochure. Please contact our service department in order to discuss all possibilities for your specific situation.

Anti Skew Knife Exit Conveyor

Separation conveyor with vacuum bar

Rollgate with reduced drop height
